

Tories ahead of Grits, NDP distant third, but trending up

METHODOLOGY

Between May 14th and May 15th 2011, Nanos Research conducted a random telephone survey of 503 Ontarians 18 years and older. A random telephone survey of 503 Ontarians is accurate plus or minus 4.4 percentage points, 19 times out of 20. For 438 decided voters, the survey is accurate plus or minus 4.7 percentage points, 19 times out of 20. Margins of error are wider for subgroup samples.

Readers should note that the data was weighted for gender and age to match the Ontarian census results. Results should be considered representative of the Ontarian population. Results may not add up to 100% due to rounding.

QUESTION: For those parties you would consider voting for PROVINCIALLY, could you please rank your top two current local preferences? (Committed Voters Only- First Preference)
